PROFESSIONAL SUMMARY

Results-driven Cybersecurity Researcher and Penetration Tester pursuing B.E. in Computer Science & Engineering (CGPA: 8.4). Skilled in VAPT, ethical hacking, threat modelling, MITRE ATT&CK-aligned detection, SOC operations, SIEM log analysis, IDS/IPS, and AI-driven security tooling. Shipped open-source cryptography tools on PyPI, published peer-reviewed security research, and led cross-functional teams of 50+. Actively pursuing CompTIA Security+ and CEH. Seeking cybersecurity internship or security analyst roles with focus on red team / blue team operations and SOC workflows.

EDUCATION

B.E — Computer Science & Engineering | C. Byregowda Institute of Technology, Kolar, Karnataka Jan 2023 – Aug 2027

Relevant Coursework: Network Security, Cryptography, Operating Systems, Cloud Computing, Data Structures, Programming Languages

PUC — Science (PCMB) | SDC Independent PU College, Kolar Gold Fields, Karnataka Aug 2021 – Mar 2023
Grade: A

WORK EXPERIENCE

Technical Lead | Club of Programmers (COPS) — CBIT Kolar Apr 2025 – Present | On-site

- Defined technical roadmap and architected full-stack solutions for 3 active club projects spanning cybersecurity, AI, and web development; improved delivery speed by ~30%.
- Mentored 15+ juniors on secure coding, code review, and Security Quality Assurance (SQA) — zero critical vulnerabilities in submitted projects.
- Organized 1 inter-college hackathon with 250+ participants across technical and non-technical domains.

Tech Lead — i-Sphere 1.0 Hackathon | Club of Programmers (COPS) — CBIT Kolar Mar 2026 – Apr 2026 | On-site

- Directed end-to-end planning for a 250+ participant, 8-event multi-domain hackathon with zero critical failures.
- Designed and deployed an official event web platform (React.js / TypeScript / Vercel) handling registrations, event management, and real-time communication.
- Structured and led a cross-functional team of 50+ members across 8 dedicated sub-teams.

Intern — Emerging Technologies | Microsoft & AICTE (Elevate_AICTE Program) Jan 2026 – Feb 2026 | Remote

- Completed 6-module program on Microsoft Azure, Cloud Administration, AI/ML, and Microsoft Copilot; designed scalable Azure infrastructure architectures, reducing provisioning time by ~25%.
- Built cognitive services pipelines and intelligent automation models using Azure AI and Power BI.
- Competencies: Cloud Security, Azure AI, Machine Learning, Microsoft Power BI, Cloud Administration & Engineering.

Cybersecurity Intern | Agratas EduTech Jun 2024 – Aug 2024 | Remote

- Conducted VAPT across 10+ test environments using Nmap, Burp Suite, and Metasploit; identified and documented 15+ vulnerabilities (3 High, 7 Medium severity) following OWASP methodology.
- Applied penetration testing fundamentals, firewall configuration, threat modelling, and IDS/IPS tuning across simulated enterprise networks; mapped findings to MITRE ATT&CK framework.
- Performed SIEM log analysis and assisted in incident triage using rule-based detection workflows; improved threat documentation accuracy by ~20% through structured agile reporting.

TECHNICAL SKILLS

Cybersecurity & Pentest: Ethical Hacking, Penetration Testing (VAPT), Threat Modelling, Threat Hunting, Incident Response, Red Team / Blue Team, SOC Operations, CVE Analysis, MITRE ATT&CK Framework, Privilege Escalation, Active Directory Security, DevSecOps, SQA

Security Tools: Kali Linux, Metasploit, Burp Suite, Wireshark, Nmap, Splunk (Fundamentals), OWASP Testing Tools, CISCO Packet Tracer

Network & Infrastructure Security: IDS/IPS, SIEM, DPI, Firewall Engineering, TCP/IP, DNS, HTTP/S, VPN, Zero Trust Architecture, Cloud-Native Security, OWASP Top 10, Linux Hardening

Cryptography & Blockchain: AES-256, RSA, Steganography, LSB, Blockchain, Smart Contracts, Decentralized Identity, QR Code Systems

Cloud & DevOps: Microsoft Azure, AWS, Docker, CI/CD Pipelines, IaC, Cloud Security, Cloud Administration

AI / ML & AI Security: Machine Learning, Deep Learning, Generative AI, RAG Systems, TensorFlow, Google Vertex AI, Agentic AI, AI Security, Prompt Engineering

Programming: Python, JavaScript, TypeScript, Java, Rust, Go, Node.js, React.js, REST APIs, HTML5, CSS3, Tailwind CSS, Git

PROJECTS

RUDRAS — Cognitive Immunological Defense Firewall — Rust · Python · DPI · ML · IDS/IPS Jan 2026 – Present

GitHub: github.com/DeepakKrishna-DK/Rudras-Cognitive_Immunological_Defense_Firewall

- Engineering next-gen AI-driven firewall combining cognitive threat modelling with immunological defense algorithms — targeting 40% improvement in unknown threat detection over traditional rule-based firewalls.
- Core features: Deep Packet Inspection (DPI), real-time adaptive threat response, IDS/IPS integration, Wireshark-compatible packet capture, Linux hardening module, cross-platform deployment (Windows/Linux).
- Applied ML anomaly detection, CVE feed integration, and MITRE ATT&CK-aligned detection logic for proactive vulnerability management.

COPS — Official Website — React.js · TypeScript · Tailwind CSS · Vercel Mar 2025 – Apr 2026

GitHub: github.com/DeepakKrishna-DK/COPS-Official-Website

- Full-stack centralized event management platform; streamlined registrations and coordination for 250+ participants.

VIKRANTA — Smart Tourist Safety System — Python · Blockchain · AI · Geo-fencing Oct 2025 – Dec 2025

GitHub: github.com/DeepakKrishna-DK/Vikranta-Smart_Tourist_Safety_System

- AI-driven proactive safety platform using geo-fencing and blockchain — reduced emergency response time by ~35% vs. manual reporting; anomaly detection achieved >90% alert accuracy.
- Authority-facing dashboards for crisis management and law enforcement coordination across 5+ simulated districts.

VIKRANTA — Blockchain ID Generation System — AES-256 · Blockchain · QR Codes Oct 2025 – Nov 2025

GitHub: github.com/DeepakKrishna-DK/Vikranta-Blockchain_ID_Generation

- Decentralized tourist registration with AES-256 encrypted storage, tamper-proof document verification, and PVC + QR code creation for 100+ simulated registrations.

HylexCrypt — TU2050 (Open-Source · Published on PyPI) — Python · AES · RSA · LSB Steganography Aug 2025 – Sep 2025

GitHub: github.com/DeepakKrishna-DK/HylexCrypt-TU2050

- All-in-one steganography + encryption toolkit combining AES-256/RSA with LSB steganography across 3+ carrier file formats — zero perceptual difference in 100% of test samples.
- Published on PyPI (pip install hylexcrypt); actively maintained and used by the global open-source security community.

CERTIFICATIONS & ACHIEVEMENTS

Cybersecurity

- Introduction to Cyber Security — Agratas EduTech (2024)

Cloud & AI

- Microsoft Elevate_AICTE: Azure, Cloud Administration, AI/ML, Emerging Technologies — Microsoft & AICTE (Feb 2026)
- Exploring AWS through Hands-on Practice — CBIT & Intellicert (Feb 2026)
- Prompt Design in Vertex AI Skill Badge — Google / Credly (Apr 2025)

Hackathons

- Quantum Quest 24-Hour Hackathon — CBIT & Unstop (Oct 2025)
- CBIT_HACKHIVE'25 — C. Byregowda Institute of Technology (Apr 2025)
- BTI_HACKFEST'25 — Bangalore Technological Institute (Apr 2025)

- Google Agentic AI Day'25 — Hack2Skill (Sep 2025)

PUBLICATIONS & RESEARCH

A Comprehensive Review on Artificial Intelligence in Drug Discovery and Pharmaceutical Research — Book Rivers Publishers, May 2025 | Co-authors: Bhanu Kiran R, Nithin S

- Peer-reviewed research published at the 7th National Conference on Recent Trends in Engineering Science & Technology (NCRTEST-2025); bridged cybersecurity-grade data integrity practices with biomedical informatics and AI/ML in pharmaceutical research.
